CELLULAR PERSONAL  
EMERGENCY RESPONSE SYSTEM

Senior Safety

The Safety Choice® Personal Emergency Response System (PERS) is a medical alarm that can preserve the independence of seniors while offering an immediate response in the first critical moments of an emergency with hands-free, two-way communication over a GSM cellular network.

With many seniors canceling traditional phone lines, we recognized the need to get help through cellular technology. With the simple push of a button, a caring, well-trained Care Representative will immediately answer the call and stay on the phone until help arrives, whether it's an ambulance, family member, friend or neighbor.

The system operates for up to 24 hours with a rechargeable back-up battery in the event of power failure and sends warning signals for a low battery. The client's *Comfort Keeper* or an emergency contact is notified of alerts. Alert activity reports are made available to help keep everyone informed.

SAFETYCHOICE®  
CELLULAR PERS INCLUDES

- Hands free, two-way voice communication only seconds after pendant is activated, with built-in speakerphone
- Both visual and audible alarm indicators, which are perfect for both hearing and visually impaired subscribers
- Rechargeable backup battery and warning signals for low battery and electrical AC power failure
- Lightweight, waterproof button on pendant or wristbad
- Friendly caring, well trained professionals providing outstanding service
- GSM cellular connectivity eliminating the need for traditional land line phone
