SAFETYCHOICE™
BY COMFORT KEEPERS®

PORTABLE PERS WITH GPS TECHNOLOGY

REST ASSURED THAT
HELP IS THERE

Wherever You Are

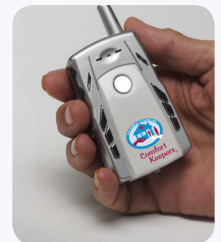

The *SafetyChoice™* Portable PERS by Comfort Keepers® is there when you need it — anytime, anywhere. It's ideal for active seniors who spend time away from home or live in rural areas. It provides peace-of-mind just knowing someone can be quickly located via state-of-the-art global tracking technology.

Anyone who becomes lost simply presses a button on the Portable PERS device, sending out a signal that indicates his or her location to the central monitoring station. By way of the unit's two-way communication feature, the individual may speak with one of the station's professionally trained representatives, who will immediately send help.

This on-call device is ideal for seniors or families that want the ability to seek help, even in remote locations, or instantly determine their location. The size of a cell phone, the device can be carried securely with a variety of belt and arm clips or bands available through Comfort Keepers.

For additional information or to order, contact your local Comfort Keepers office.
