MEDICATION SYSTEM

MEDICATION DISPENSING
SOLUTION TO HELP KEEP

Seniors Safer

The SafetyChoice® TabSafe unit by Comfort Keepers® offers solutions for your medication organization needs. For those who find they may need just a little more help managing their medications, we offer the TabSafe Medication System, which releases medication from secure cartridges to a locked drawer located at the bottom of the unit.

Research indicates that approximately 40% of people entering nursing homes do so because they are unable to self-medicate in their homes. In addition, 30% of all hospital admissions for people over age 65 are directly attributable to missed doses or overdoses of medication.

If you have problems remembering to take your medications, or are working to manage a complicated medication regimen, the TabSafe Medication System is an affordable and effective option. And it is easy to use!

If a dose is missed, the TabSafe Medication System makes an automated call to the client's contact list. If there is no response, an alert is sent to the monitoring station, which makes a call to the client or caregiver.

For additional information or to order, contact your local Comfort Keepers office.

SAFETYCHOICE® TABSAFE MEDICATION SYSTEM

- Takes the worry out of managing your own medications
- Easily filled cartridges replace current pill vials
- Reminds you to take medication on time
- Secure storage of medication
- Calls up to three phone numbers to alert others if medication is not taken
- Guardian TabSafe connects to your existing phone line without interference
- Your identification and schedule of medication is sent to your Guardian TabSafe
- Cartridge lights flash and alerts sound when medication is due
- As needed medication (PRN) can be released safely, without risk of overdose
